Visitor Management System

V5

**Security
Surveillance
Risk Management
Loss Prevention
Solutions**

Flexible

- Standalone or Integrates seamlessly with the iTrak Incident Reporting & Risk Management System
- One click sign-in/out and badge printing
- Pre-registration capabilities
- Support for third party badges with bar codes

Cost Effective

- Client/server architecture provides a single centralized database for multiple properties
- Maintains existing iTrak security and drop downs

Visitor Management

- Central visitor application to track current and pending visitors
- Visitor and group registration
- Multiple bar code support
- Auto host e-mail notification

Powerful

- Integration with existing subject, generic participants and personnel, including ban/watch notification
- Ability to attach scanned identification documents to visitors

Badge Design & Printing

- Custom badge design
- Multi-property badging capability

Comprehensive Reporting

- Support for export to PDF, Microsoft Excel, Word and Crystal Reports

In today's security conscious environments, entering, managing and tracking visitors is a key task. Front desk staff and security officers in most organizations today use unreliable, inaccurate and inefficient paper based systems.

The iPass Visitor Management System provides a comprehensive application to pre-register/register visitors, while delivering custom badging services and maintaining a real-time and historical list of current and pending authorized visitors throughout the enterprise.

iPass delivers a complete visitor management solution integrated within the iTrak Incident Reporting Platform. This integration provides the key advantage of access to existing personnel, banned/watched subjects and location synergies, reducing the need for duplicate visitor information or multiple redundant information entry.

With iPass, key visitor information can be quickly registered accurately and securely, with the ability to print high quality custom professional visitor badges. iPass enhances the visitor management process delivered within a highly integrated and secure environment. iPass takes advantage of existing iTrak technologies and delivers the same iTrak interface, security options and ease of use, reducing training requirements for existing staff.

iPass provides the ability to quickly capture all relevant visit, visitor status, time in/out and host details including the ability to attach additional media such as pictures and video. With an optional signature pen interface, high security environments can also collect electronic signatures for both sign in and sign out.

The iPass Visitor Management System is a logical extension to the existing proven iTrak Incident Reporting Platform. It delivers a full featured management system to track, capture and report on detailed visitor information across multiple locations, while delivering custom professional badging capabilities.

Available as a standalone package or as part of the iTrak platform solution, the iPass Visitor Management System is an ideal addition to any corporate security environment.

REQUIREMENTS

iTrak Client Software

- Microsoft® Windows 2000
- Microsoft® Windows XP

iTrak Client Hardware

- Pentium III 800MHZ or higher
- 512 MB RAM (1 GB recommended)
- 100 MB available disk space
- SVGA Monitor capable of a minimum of 800x600 resolution
- Network Card (Networked installations)
- CD-ROM Drive
- Mouse

SQL Server Software

- Microsoft® Windows 2000 Server with Service Pack 2 installed
- Microsoft® Windows 2003 Server with Service Pack 1 installed

SQL Server Hardware

- Pentium 4 2.0 GHz or higher
- 1 GB RAM (2 GB recommended)
- 350 MB available disk space
- SVGA Monitor capable of a minimum of 800x600 resolution
- Network Card (Networked installations)
- CD-ROM Drive
- Mouse

Microsoft® SQL Server™ 2000

- Microsoft Windows ® 2000 Server with Service Pack 2 installed and Microsoft SQL Server 2000 installed and set for Mixed Mode operation

Microsoft® SQL Server™ 2005

- Microsoft Windows ® 2000 Server with Service Pack 2 installed and Microsoft SQL Server 2005 installed and set for Mixed Mode operation

* SQL licences are not included in the price of the software.
